REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach a device comprising

- a) a first LED array having a first anti-parallel configuration excluding any parallel connections to capacitors, and a first resonant impedance circuit including a first resonant inductor and a first resonant capacitor connected to the first LED array in a first series resonant, series loaded configuration having the first resonant inductor connected in series to the inverter, and the resonant capacitor connected in series between the resonant inductor and the first LED array as defined in claims 11, 22 and 29, or
- b) a first capacitor array connected in series between the first resonant inductor and the first LED inverter as defined in claim 15,
- c) the first resonant circuit having a second resonant capacitor connected to in series between the first resonant inductor and a second LED array as defined in claim 31-32, or
- d) the first resonant impedance circuit/the second impedance circuit including means for directing a third flow of a second AC through the second LED array in response to the alternating voltage having a first polarity and directing a fourth flow of the second AC through the second LED array in response to the alternating voltage having a second polarity as defined in claims 33 and 36. Therefore, claims 11-38 are presently allowed.
- 2. Any comments considered necessary by applicant must be submitted no latter than the payment of the issue fee and, to avoid processing delays, should preferably
